

A NEW CHECK, BEFORE CHECKOUT

You will now need to approve your child's amwali account online transactions directly through ADIB Mobile app.

One Time Passwords (OTPs) will no longer be sent to approve online transactions involving your child's amwali account. Instead, your approval will be required through ADIB Mobile app to complete any online purchase. This is only an interim solution until this approval journey is enabled directly within your child's Amwali app.

How it works:

Once your child initiates an online purchase, he/she will receive an SMS informing them that the transaction requires parental approval.

You will then receive an SMS notification, prompting you to log in to ADIB Mobile App to review and approve the transaction within 5 minutes.

Once your approval is confirmed, the transaction will be completed.
